

Assessment

Answer the following five open questions for your post-module assessment, based on two single case studies discussed in the training.

- A. Assess if all information you need for your reports is provided. Do you believe there is any information missing?
- B. What steps do you need to follow to complete an anamnesis report? How you can do it? What do you have to be careful about?
- C. What are the differences between the social profile, psychological profile and medical profile of a minor in the anamnesis report? Do you think additional information should be included?
- D. Why does the date in these reports need to be collected? How does it help you to distinguish the normal from the abnormal behaviour of a minor?
- E. What information does a youth worker need to have a complete minor's profile? What kind of information will help their anticipation of potential crisis situations?
